@timestamp	channel	nick	message
2014-03-08T22:09:56.752-06:00	#archlinux	talental	I've done this before with other computers.
2014-03-08T22:09:53.048-06:00	#debian	potatoceleron	so... yes?
2014-03-08T22:09:45.186-06:00	#arduino	how2snmp	I am assuming the patch is against the latest agentuino release
2014-03-08T22:09:42.136-06:00	#debian	potatoceleron	debian has probably the most complete repos there are... that i know of. i don't know how crunchbang compares, but i bet it's competitive
2014-03-08T22:09:39.788-06:00	#archlinux	c2tarun	sirderpalot: check out the page
2014-03-08T22:09:34.658-06:00	#archlinux	talental	c2tarun: There is no default pin. I'm supposed to get a pin from the computer, which I type into the keyboard.

2014-03-08T22:09:31.823-06:00	#archlinux	john_f	on the pkg page for each
@timestamp	channel	nick	message
2014-03-08T22:09:31.823-06:00	#archlinux	john_f	on the pkg page for each
2014-03-08T22:09:30.248-06:00	#archlinux	sirderpalot	c2tarun: how so
2014-03-08T22:09:27.894-06:00	#arduino	how2snmp	Thank you Xark, I will look into this.
2014-03-08T22:09:23.409-06:00	#archlinux	john_f	greymalkin: website has logs in svn
2014-03-08T22:09:21.655-06:00	#archlinux	c2tarun	sirderpalot: bad title :P
2014-03-08T22:09:17.957-06:00	#mythtv-users	Vaska	Must just be me :(
2014-03-08T22:09:09.023-06:00	#perl	kardan	thanks geekosaur, will have at look.
2014-03-08T22:09:06.645-06:00	#archlinux	sirderpalot	trololol.
2014-03-08T22:09:00.801-06:00	#archlinux	phrik	c2tarun: xinitrc - ArchWiki: < https://wiki.archlinux.org/index.php/xinitrc >
2014-03-08T22:09:00.058-06:00	#debian	LonelyDanbo	are there hardware testing apps in Debian?
2014-03-08T22:08:59.004-06:00	#archlinux	sirderpalot	!give c2tarun g xinitrc
2014-03-08T22:08:56.398-06:00	#archlinux	c2tarun	talental: try to look for default pin in manual.
2014-03-08T22:08:54.608-06:00	#mythtv-users	Vaska	I'm currently using the nvidia driver 334.21 with kernel 3.13.2 on Gentoo
2014-03-08T22:08:50.764-06:00	#archlinux	greymalkin	Are there release notes for package upgrades?
2014-03-08T22:08:34.052-06:00	#archlinux	c2tarun	I can't find anything about .xinitrc in archwiki
2014-03-08T22:08:31.018-06:00	#debian	potatoceleton	it boots from the usb, the installer does not complete (it doesn't abort, it hits a wall)
2014-03-08T22:08:22.027-06:00	#archlinux	talental	I'm trying to pair a bluetooth keyboard using bluetoothctl. When I go to pair it doesn't give me a pin, and the authentication times out. Help please?
2014-03-08T22:08:15.352-06:00	#ubuntu	usr13	exit

@timestamp	channel	nick	message
2014-03-08T22:08:14.587-06:00	#archlinux	c2tarun	what can I do about it?
2014-03-08T22:08:13.517-06:00	#perl	geekosaur	(Java is a specific exception since it does actual M:N threading, but it also requires you to do extra work to avoid the usual problems with real thre...
2014-03-08T22:08:07.926-06:00	#debian	LonelyDanbo	maybe it's just a mixed up power saving feature. I hope it didn't overheat while I was AFK for some reason.
2014-03-08T22:08:01.642-06:00	#debian	dvs	first no USB boot, now this!
2014-03-08T22:07:38.315-06:00	#archlinux	john_f	if using startx
2014-03-08T22:07:34.058-06:00	#archlinux	john_f	this usually means you don't have .xinitrc setup
2014-03-08T22:07:33.068-06:00	#perl	geekosaur	most so-called threads in many other languages are really event loops, and the code people write for them would break badly if run in actual threads.
2014-03-08T22:07:29.863-06:00	#mythtv-users	[R]	works fine for me
2014-03-08T22:07:12.484-06:00	#debian	potatoceleron	your new pc, seems haunted
2014-03-08T22:07:05.486-06:00	#archlinux	john_f	must be
2014-03-08T22:07:01.878-06:00	#archlinux	john_f	or is that ms...

2014-03-08T22:06:54.857-06:00	#videolan	vlc-build	build #158 of winrt-bin-win32-x86 is complete: Failure [4failed Compile Upload to FTP] Build details are at http://buildbot.videolan.org/builders/w...
2014-03-08T22:06:52.687-06:00	#perl	kardan	currently I am running multiple instances but this is not very elegant.
2014-03-08T22:06:52.215-06:00	#debian	LonelyDanbo	also came back to an unpleasant situation. for some reason my new PC turned itself off. when I turned it back on no peripherals worked and I had to hi...
2014-03-08T22:06:47.970-06:00	#perl	perlbot	geekosaur: Asynchronous event-driven IO is awesome in Perl with POE, IO::Async, IO::Lambda, Reflex, AnyEvent and Coro, among others.
2014-03-08T22:06:47.569-06:00	#perl	geekosaur	perlbot, events
2014-03-08T22:06:47.453-	#chat	Xenith	I haven't upgraded yet

timestamp	channel	nick	message
2014-03-08T22:06:45.195-06:00	#debian	potatoceleron	when i've compiled something that wasn't a "package" from outside the repos, a script has generally taken care of it automatically for me. as a trigge...
2014-03-08T22:06:43.922-06:00	#perl	geekosaur	the way to do this is an event driven mechanism
2014-03-08T22:06:40.859-06:00	#mythtv-users	Vaska	Hello - is there a bug with the opengl painter? With .26 and .27 I've been unable to use opengl as a theme painter without it crashing.
2014-03-08T22:06:40.805-06:00	#chat	Xenith	no
2014-03-08T22:06:24.880-06:00	#archlinux	john_f	it waited .5 seconds before starting to unload things
2014-03-08T22:06:16.836-06:00	#launchpad	tachyons	wgrant, sorry then :-)
2014-03-08T22:06:13.926-06:00	#arduino	how2snmp	But you might have just hit gold
2014-03-08T22:06:09.763-06:00	#arduino	how2snmp	Why on Earth that does not show up for "arduino snmp trap" on Google is beyond me
2014-03-08T22:06:03.398-06:00	#chat	brad[]	did you lose keyboard when you upgraded is that what brought this up
2014-03-08T22:05:58.408-06:00	#perl	kardan	I have an open issue to have use timers for non-blocking downloads with curl, playing audio with mplayer, showing the status of both while beeing to a...
2014-03-08T22:05:54.117-06:00	#archlinux	c2tarun	john_f: how can I figure out why it didn't run? and on which line did you see this?
2014-03-08T22:05:31.825-06:00	#launchpad	wgrant	This isn't Launchpad-specific; you can reproduce it locally with pbuilder, sbuild, or even dpkg-buildpackage.
2014-03-08T22:05:31.549-06:00	#debian	potatoceleron	debian doesn't arbitrarily add steps, unless you're building your own distro (you're not, just installing from repos.)
2014-03-08T22:05:21.670-06:00	#archlinux	john_f	yes, gnome-session or whatever
2014-03-08T22:05:13.486-06:00	#archlinux	c2tarun	wm is windows manager?
2014-03-08T22:05:06.517-06:00	#launchpad	wgrant	You'll need to learn to debug.
2014-03-08T22:05:05.761-06:00	#debian	potatoceleron	i doubt compiling enters into it
2014-03-	#launchpad	wgrant	I don't have time to investigate everyone's simple dependency issues myself.

2014-03-08T22:05:00.641-06:00 #archlinux john_f your wm didn't run

2014-03-08T22:04:47.180-06:00 #debian LonelyDanbo oh man. I'm guessing what I'm wanting to do is "create a rootfs for a machine of a different architecture" which means I need this "equivalent version..."

2014-03-08T22:04:44.502-06:00 #archlinux c2tarun hmmm

2014-03-08T22:04:33.436-06:00 #debian dequeued if you didn't mount the hdd, then the data would just be written to /

2014-03-08T22:04:30.213-06:00 #arduino Xark but*

2014-03-08T22:04:28.001-06:00 #archlinux john_f c2tarun: nothing wrong there, radeon, mouse, keyboard load ok

2014-03-08T22:04:24.341-06:00 #arduino Xark Well there is the code at <http://forum.arduino.cc/index.php/topic,50848.msg770678.html> (bug probably needs tweaking).

2014-03-08T22:04:23.535-06:00 #ubuntu Tom1 beldar: it shows the cpu temps of both two cpu cores,

2014-03-08T22:04:19.261-06:00 #debian dequeued the whole point of it is that the software can't tell and doesn't need to understand anything about the underlying storage

2014-03-08T22:04:02.163-06:00 #ubuntu Tom1 Beldar: yes i have lm-sensors

2014-03-08T22:03:54.990-06:00 #debian potatoceleron right but that's where he wants it

2014-03-08T22:03:43.196-06:00 #debian dequeued but it doesn't have to be

2014-03-08T22:03:41.540-06:00 #arduino how2snmp Yea I saw that on github, but he only had his Readme up

2014-03-08T22:03:40.638-06:00 #arduino Xark how2snmp: Perhaps you can use/adapt the code referenced there.

2014-03-08T22:03:40.537-06:00 #debian dequeued it may be on a hdd

2014-03-08T22:03:32.676-06:00 #perl Tekk_ awesome

2014-03-08T22:03:29.617-06:00 #launchpad tachyons wgrant, but still <https://code.launchpad.net/~aboobackervyd/+archive/apertium-dailybuild/+recipebuild/668340>

2014-03- @timestamp 08T22:03:27.584-	#perl ◀ channel ▶	Zoffix ◀ nick ▶	Correct. ◀ message
06:00			
2014-03- 08T22:03:23.976- 06:00	#debian	potatoceleon	dequeued: yeah and a mountpoint is just a subdirectory
2014-03- 08T22:03:22.964- 06:00	#perl	Tekk_	Zoffix: and that keeps \$old unsubstituted?
2014-03- 08T22:03:03.202- 06:00	#debian	dequeued	a directory is just a folder
2014-03- 08T22:03:01.799- 06:00	#perl	Zoffix	Tekk_, though, that's a new feature starting in 5.14; in older versions you'd write (my \$new = \$old) =~ s/whatever/eh/;
2014-03- 08T22:02:58.780- 06:00	#arduino	Xark	how2snmp: Hmm, have you seen https://code.google.com/p/agentuino/issues/detail?id=8
2014-03- 08T22:02:53.819- 06:00	#archlinux	Sanchal_	I appear to have broken ALSA on a headless machine I use as a home server... Somehow. When I use amixer it responds with: amixer: Mixer attach default...
2014-03- 08T22:02:51.687- 06:00	#debian	potatoceleon	so it's another way of saying "on a hdd"
2014-03- 08T22:02:46.036- 06:00	#debian	LonelyDanbo	oh ok.
2014-03- 08T22:02:37.410- 06:00	#debian	potatoceleon	yeah but when you mount the hdd, the mountpoint IS a subdirectory
2014-03- 08T22:02:34.043- 06:00	#perl	Tekk_	Zoffix: thanks
2014-03- 08T22:02:28.647- 06:00	#perl	Zoffix	Tekk_, my \$new = \$old =~ s/whatever/eh/r;
2014-03- 08T22:02:18.603- 06:00	#arduino	how2snmp	The interrupt on the relay is easy
2014-03- 08T22:02:16.828- 06:00	#perl	Zoffix	Tekk_, /r
2014-03- 08T22:02:16.770- 06:00	#debian	LonelyDanbo	I don't want it in a subdirectory though. I want it on another HDD.
2014-03- 08T22:01:59.596- 06:00	#debian	LonelyDanbo	but it says "debootstrap is a tool which will install a Debian base system into a subdirectory of another, already installed system."
2014-03- 08T22:01:58.872- 06:00	#perl	kardan	I find it easier to read with quoting but mostly I forget them. So yea, I need to polish a lot.
2014-03- 08T22:01:54.163- 06:00	#perl	Tekk_	maybe I'm not good at searching, but I've looked in both the camel book and searched around. Is there no way to have regex return the substitution rat...

timestamp	channel	nick	message
2014-03-08T22:01:51.939-06:00	#arduino	how2snmp	Specifically for a burgler alarm sort of thing
2014-03-08T22:01:51.796-06:00	#archlinux	phrik	Title: Paste #186664 at spacepaste (at bpaste.net)
2014-03-08T22:01:50.562-06:00	#archlinux	c2tarun	john_f: http://bpaste.net/show/186664
2014-03-08T22:01:40.494-06:00	#debian	potatoceleton	oh, okay. this is a cool page. i used to be terrified of stuff like this. it makes SOME sense (haven't tried it yet of course, no need yet)
2014-03-08T22:01:33.904-06:00	#arduino	how2snmp	The application I have in mind is about as simple as a trap can get - when a relay is tripped, send out an SNMP trap
